FEDERAL MANAGEMENT CIRCULAR

FMC 74-1: Federal energy conservation
Supplement 1

March 12, 1974

TO THE HEADS OF EXECUTIVE DEPARTMENTS AND ESTABLISHMENTS

1. Purpose. This supplement revises Attachments "B" and "C" to FMC 74-1, dated January 21, 1974, entitled Federal energy conservation.
2. Background. The revision to FMC 74-1 is made as a result of comments received from various Federal agencies and private groups. The comments received on the parking policy contained in Attachment "B" indicated that parking spaces assigned on the basis of a severe physical handicap should not be considered employee parking for purposes of achieving the required 10/90 carpool assignment ratio. The comments on the lighting levels contained in Attachment "C" suggested that greater flexibility was required to make the standards workable on a Government-wide basis.
3. Effect on other issuances. Federal Property Management Temporary Regulations D-43 and D-44, dated February 8 and February 20, 1974, will be amended to reflect this change.
4. Policy intent. The policy intent of this supplement is to give agencies greater flexibility in assigning parking spaces to handicapped employees and in achieving prescribed lighting standards.
5. Instructions. Remove Attachment "B" and pages 1 and 2 of Attachment "C" and insert the attached corresponding new pages.

ARTHUR F. SAMPSON
Administrator of General Services
